

Rowan Liu

FULL-STACK ENGINEER

Shanghai | +86 155 4246 1419 | lcf33123@163.com | rowanliu.com

Full-stack engineer with 10 years of experience building complex consumer and enterprise applications with Angular, Vue, and Node.js. Experienced in English-speaking Agile teams, platform modernization, BFF services, and production incident analysis.

CORE SKILLS

Frontend: Angular, Vue, TypeScript, RxJS, Tailwind CSS, NG-ZORRO

Backend & Cross-platform: Node.js, NestJS, Spring Boot, uni-app, MPX, WeChat Mini Programs

Engineering: GitHub Copilot, AI agents, Figma, Kibana, Agile delivery, English-language collaboration

PROFESSIONAL EXPERIENCE

Accenture (China) Co., Ltd.

Oct 2024–Present

Full-Stack Engineer | Shanghai

- Develop and maintain Cathay Pacific's consumer online check-in platform, delivering responsive Angular UI, workflow improvements, and production fixes.
- Build Node.js BFF aggregation APIs that combine, filter, and adapt backend data, reducing front-end processing complexity.
- Contribute to Angular upgrades from 12 through 20, adopt Signals and standalone components, and package Scandit document scanning as a reusable component.
- Use analytics and Kibana logs to diagnose document-recognition failures and drive product remediation; collaborate in English within two-week Sprints.

Lingxiang Creative Software

Apr 2022–Sep 2024

Full-Stack Engineer | Dalian

- Led iCluster Web development with Angular, Tailwind CSS, and Spring Boot, delivering end-to-end product features.
- Encapsulated Keycloak authentication capabilities with JHipster and Spring Boot, simplifying integration for business applications.
- Planned and executed the Angular 13-to-15 upgrade, covering risk assessment, dependency adaptation, and performance improvements.

Dalian Yingnuoruixin Technology

Jul 2020–Apr 2022

Full-Stack Engineer | Dalian

- Built dynamic forms using Angular, NG-ZORRO, RxJS, NestJS, and TypeORM.
- Delivered WeChat Mini Program and PC applications for an AstraZeneca clinic project, establishing reusable uni-app foundations and components.
- Developed reusable ABP business and layout components; estimated work, assigned tasks, reviewed code, and mentored junior engineers.

DiDi

Nov 2019–Jul 2020

Senior Frontend Engineer | Beijing

- Built driver-facing campaign H5 pages and partnered with designers to deliver high-fidelity interfaces and interactions.
- Upgraded shared Vue CLI plugins for @vue/cli 4 compatibility and delivered WeChat Mini Programs with MPX.

JD.com

Sep 2017–Nov 2019

Frontend Engineer | Beijing

- Rebuilt an IDC infrastructure platform from the ground up with Vue.js, spanning 100K lines of code and more than 80 pages.
- Developed the work-order module and idc-cli scaffolding; introduced analytics and maintained dependencies to improve delivery and maintainability.

Beijing Botu Zongheng Technology

Feb 2016–Aug 2017

Frontend Engineer | Beijing

- Built the project foundation with RequireJS, Bootstrap, jQuery, HTML, and CSS3; introduced Gulp and browser-sync to improve development efficiency.

EDUCATION & LANGUAGE

Heilongjiang Bayi Agricultural University | B.S. in Computer Science and Technology

Sep 2012–Jun 2016

English: Professional working proficiency; CET-4
