

Rowan Liu

Shanghai | 15542461419 | lcf33123@163.com | rowanliu.com

10 years of front-end and full-stack development experience, specializing in Angular, Vue, Node.js, and complex customer-facing systems. Experienced in English meetings and cross-team Agile collaboration, with strengths in production issue diagnosis, front-end architecture evolution, and engineering efficiency improvements.

Core Skills

Front-End Development: Angular, Vue, TypeScript, RxJS, Tailwind CSS; experienced in component-based development, complex business interfaces, and front-end architecture evolution.

Full-Stack Development: Node.js, NestJS, Spring Boot, TypeORM; experienced with BFFs, APIs, authorization, authentication, and integration testing.

Engineering and AI: experienced in unit testing, code reviews, and architecture modernization; able to use AI tools to assist with coding, test generation, code review, and troubleshooting.

Learning and Collaboration: quick to adopt new Angular capabilities; AWS SAA certified, with experience collaborating in English and mentoring new team members.

Professional Experience

Accenture (China) Co., Ltd.

Oct 2024–Present

Full-Stack Software Engineer | Shanghai

- Contributed to Cathay Pacific's customer-facing online check-in system, owning Angular responsive pages, workflow optimization, and production issue fixes.
- Developed Node.js BFF aggregation APIs for back-end data composition, filtering, and adaptation, reducing front-end processing complexity.
- Drove the Angular 12-to-20 upgrade, adopting Signals and Standalone Components, and built a Scandit component for scanning multiple identity documents.
- Used instrumentation and Kibana to identify identity-recognition issues and drive solutions; participated in English meetings, cross-team collaboration, and two-week Sprint delivery.
- Earned the AWS Certified Solutions Architect – Associate (AWS SAA) certification, with a foundation in cloud architecture design and service selection.
- Packaged and reused engineering practices such as unit testing and Code Review, and introduced the official Angular guidance to help the team develop with current Angular syntax and best practices.

Rocket Software (Beijing) Co., Ltd., Dalian Branch

Apr 2022–Sep 2024

Full-Stack Software Engineer | Dalian

- Led development of the iCluster Web product, delivering front-end and back-end functionality with Angular, Tailwind CSS, and Spring Boot.
- Packaged Keycloak authentication capabilities with JHipster and Spring Boot, simplifying integration and use across business systems.
- Planned and implemented the Angular 13-to-15 upgrade, including risk assessment, dependency adaptation, and performance optimization.
- Used Figma to turn requirements into product prototypes, supporting feature reviews and iteration decisions.

Dalian Innocellence Technology Co., Ltd.

Jul 2020–Apr 2022

Full-Stack Software Engineer | Dalian

- Developed dynamic form functionality with Angular, NG-ZORRO, RxJS, NestJS, and TypeORM.
- Built a mini program and PC application for AstraZeneca clinic projects, using uni-app to consolidate foundational code and shared components.
- Packaged business and layout component libraries with ABP; responsible for effort estimation, task allocation, code reviews, and mentoring new team members.

Beijing Didi Infinity Technology Development Co., Ltd.

Nov 2019–Jul 2020

Senior Front-End Software Engineer | Beijing

- Developed driver-side promotional H5 pages and worked with the design team to achieve approximately 99% design fidelity and interaction accuracy.
- Upgraded the team's Vue CLI shared plugins for @vue/cli 4 compatibility, and delivered WeChat mini programs with MPX.

Beijing JD Shangke Information Technology Co., Ltd.

Sep 2017–Nov 2019

Front-End Software Engineer | Beijing

- Rebuilt an IDC infrastructure platform from the ground up with Vue.js, covering 100,000 lines of code and more than 80 pages.
- Developed the ticketing module and idc-cli scaffolding, added instrumentation, and continuously upgraded project dependencies to improve collaboration and maintenance efficiency.

Beijing Botu Zongheng Technology Co., Ltd.

Feb 2016–Aug 2017

Front-End Software Engineer | Beijing

- Built project frameworks with RequireJS, Bootstrap, jQuery, HTML, and CSS3; introduced Gulp and browser-sync to improve development efficiency.

Education and Languages

Heilongjiang Bayi Agricultural University | Computer Science and Technology | Bachelor's Degree

Sep 2012–Jun 2016

English: CET-4; able to use English as a working language
